## Personal Profile

Throughout my career as a Frontend developer, I have emphasized the importance of scalable and well documented code. I enjoy working collaboratively, but as a self-managed and independent person I can also run projects on my own.

## Work Experience

### Oct 2021 – Running

eGeneration

Dhaka, Bangladesh

### UI/UX Designer & Developer

As a UI Designer & Developer create and develop UI/UX design is my first priority. Besides that i am working to create wireframe form BRS with business analysis team. Based on wireframe i am creating and developing UI for different applications. On the other hand i am working to improve existing UI/UX for some project.

### March 2020 – September 2021

CommEngine

Dhaka, Bangladesh

### UI/UX Designer & Developer

As a UI Designer & Developer i have created UI design based on customer requirements. And then converted those UI to pixel-perfect responsive web templates using HTML, CSS and JavaScript/jQuery. On the other hand i have improve existing UI/UX and fixed responsive and cross-browser issues.
